## ZAPOROZHYE "KOMMUNAR" AUTOMOBILE PLANT

The Zaporozhye "Kommunar" Automobile Plant in Zaporozhye, USSR at coordinates 47 49N - 35 11E was observed on [REDACTED] At that time the plant contained approximately 1,527,475 square feet of productive floorspace, excluding from this category administration, barracks, storage and other support buildings. Items 7,8,9,10 and 11 are reportedly engaged in wire and nail manufacture, but because they are part of this complex and share a common administration and support area they have been included in this study.

25X1

The plant was found to contain no construction in process and no change in status from [REDACTED]

K1

Figure 1 is a seven time enlargement of the plant and Figure 2 a line drawing showing building designations which are keyed to Table I which gives the description and dimensions of the productive facilities within the plant. All measurements were made by the NPIC Technical Intelligence Division and are considered to be accurate within  $\pm 10$  feet or  $\pm 3$  percent, whichever is greater.
